Calendar

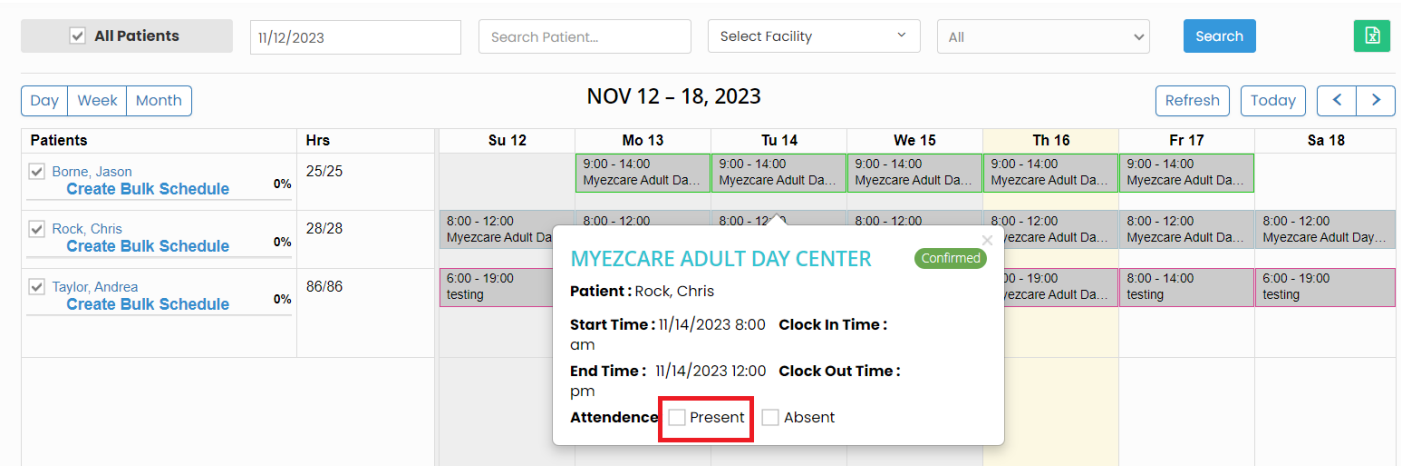

A scheduling calendar is used to manage and coordinate appointments, visits, and care plans for patients in the Adult Day Care. A scheduling calendar typically displays dates in a monthly or weekly grid format, with each day divided into time slots. This makes it easy to view and plan activities over a specific time frame.

> **Scheduling Tab >> Calendar**

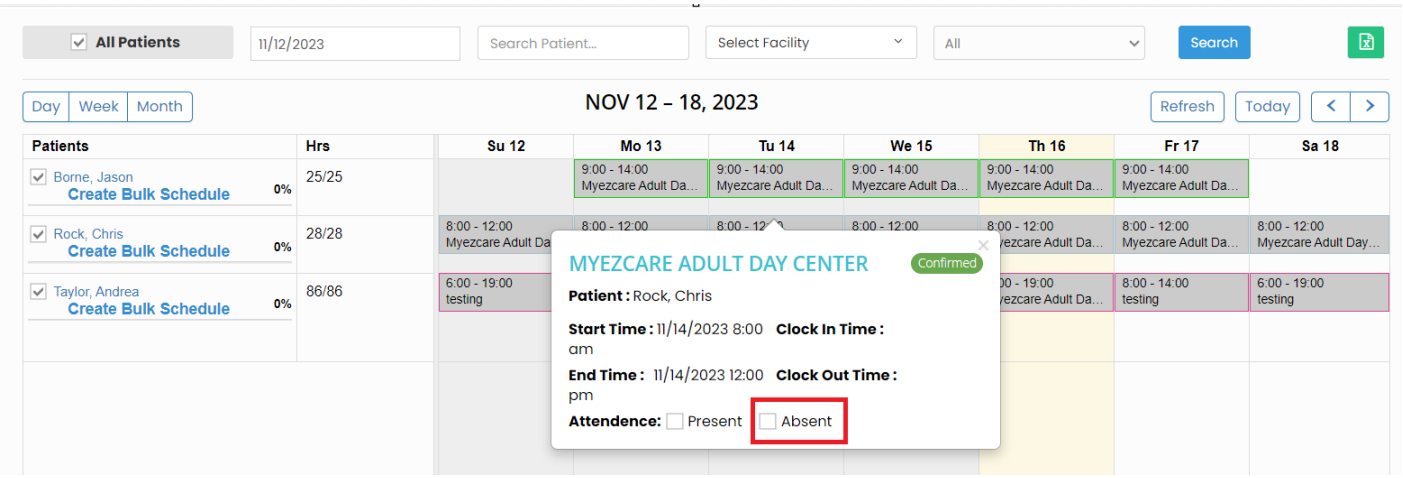

The user can view the schedules of all the patients in this calendar.

The user can mark the attendance as Present for the patient by clicking the confirmed schedules.

If the patient is Absent, then the reason for the Absence can also be updated in the system. Click on the schedule and check Absent option.
