Case Manager

A case manager plays a crucial role in coordinating and managing the care of patients. They assess the patient's needs, create care plans, coordinate with healthcare providers, ensure necessary services are provided, and monitor the patient's progress, all while focusing on maintaining the patient's comfort.

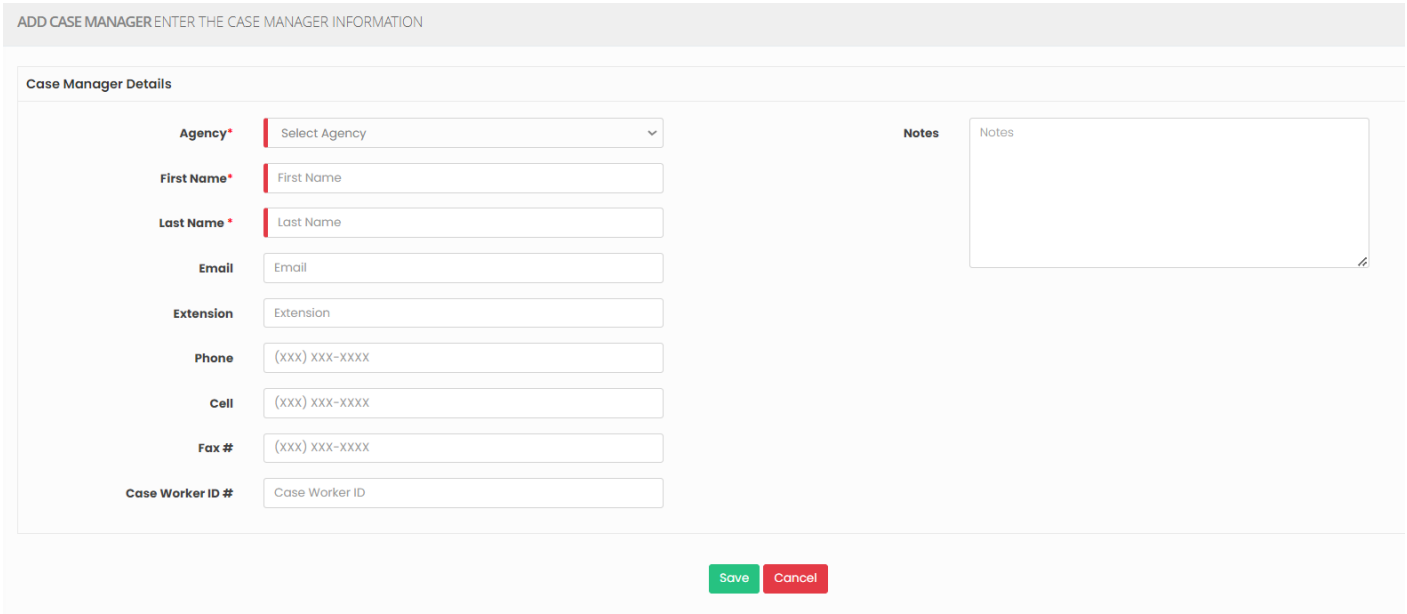

Adding Case Manager

> Note: All Fields marked with * are mandatory and must be filled out, otherwise the system will generate an error indicating that the required information is missing.

> **Settings >> Case Manager >> +Add option**

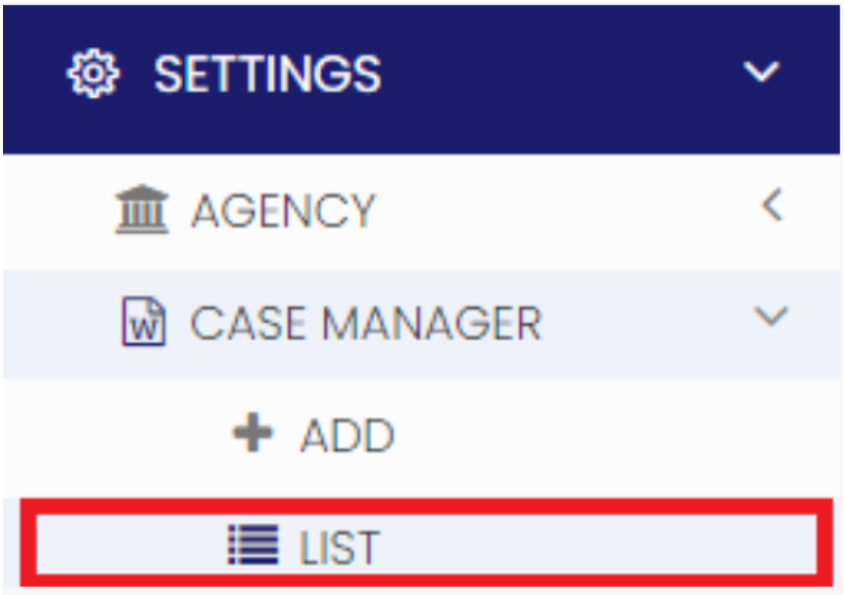

Update the required fields in Case Manager details and Click Save option.

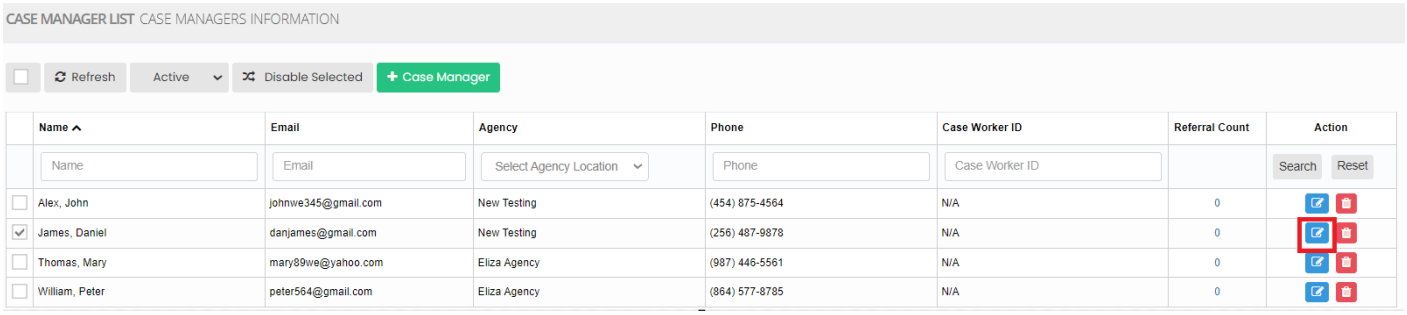

Editing Case Manager

For Editing the Case Manager information, follow these steps:

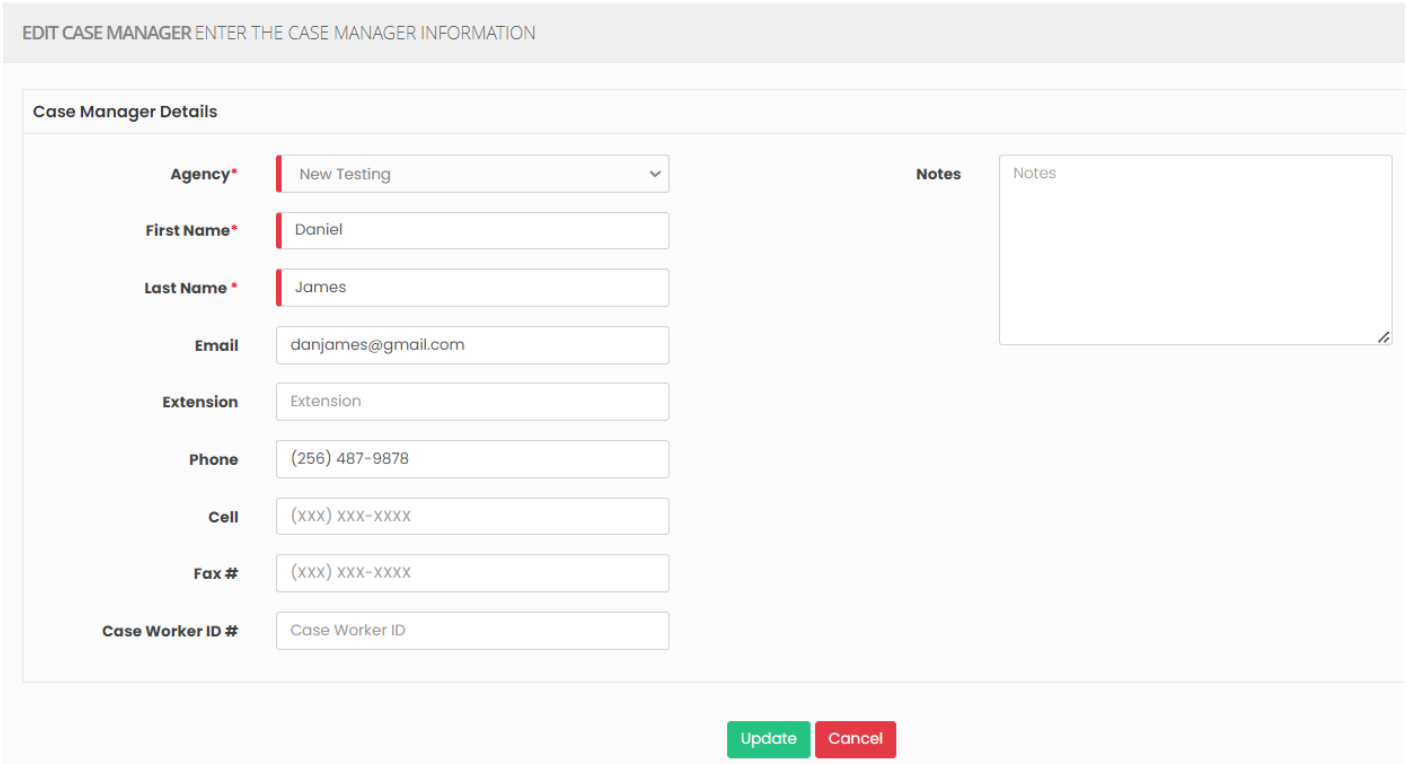

> **Settings >> Case Manager >> List**

Select the Case Manager from List and Click Edit option on the right side of the screen.

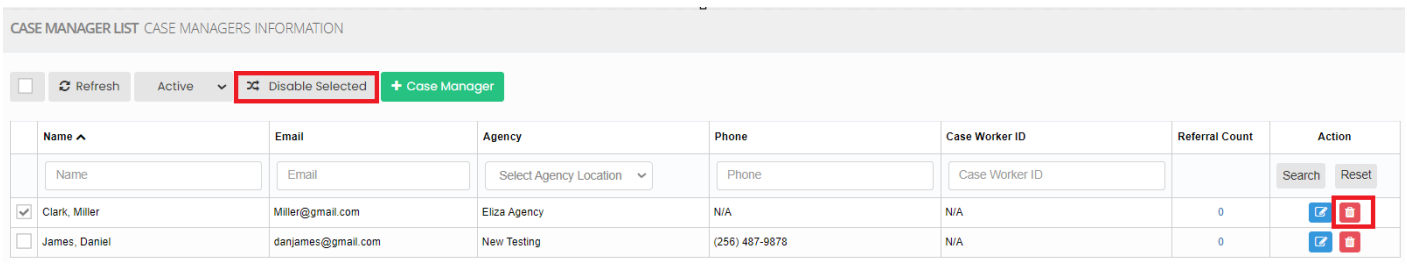

Now, edit the required information and click update option.

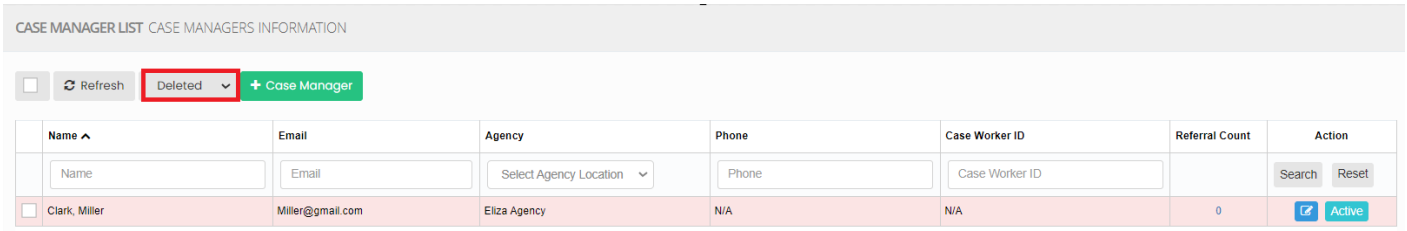

Delete Case Manager

> **Settings >> Case Manager >> List**

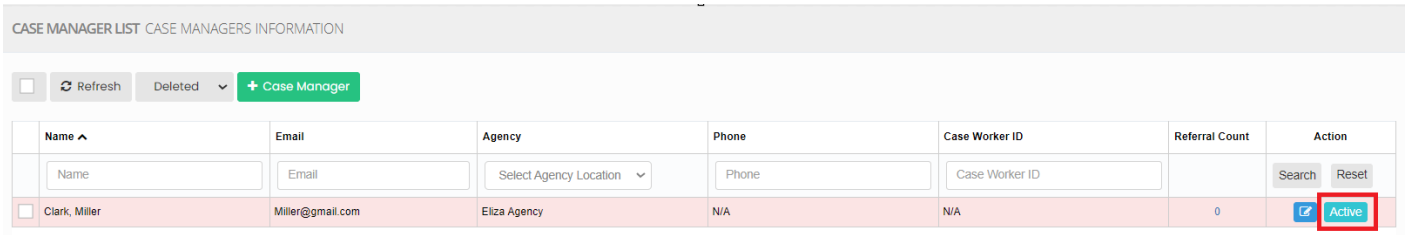

Select the Case Manager from the list using the check box and click Delete or Disable Selection option on the screen.

Now, the Case Manager details gets deleted and we can view the Case Manager under Deleted list.

The user can also Restore the deleted Case Manager details by using the option Active on the right side of the screen.
