Client List

A patient list in an adult day care facility is a roster of individuals who are receiving care and support services. It includes their names, medical conditions, care plans, and emergency contacts. This list helps staff coordinate and provide appropriate care, ensuring the safety and well-being of participants during their stay.

> **Client >> List**

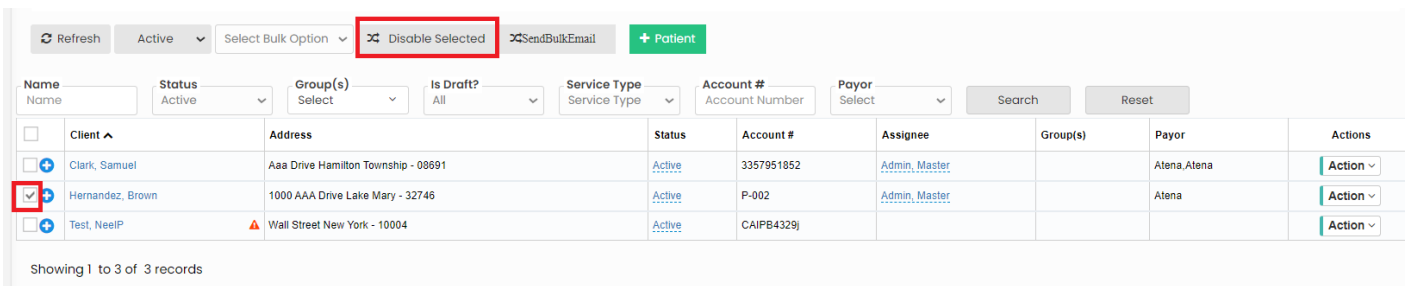

Referral Details

Click the option  in client list before each patient name to view the referral details of the patient in the system.

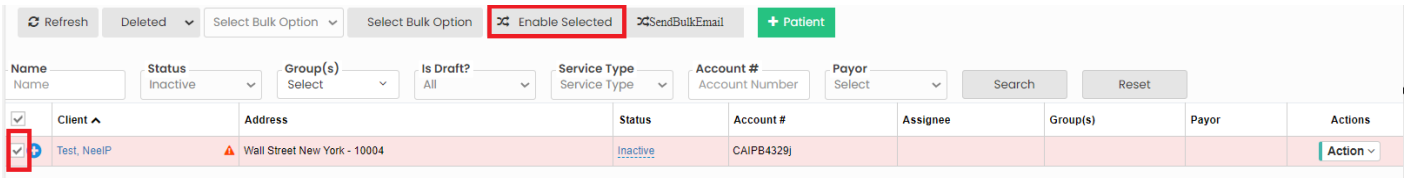

Delete Patient

The Patient can be deleted from the system by using the option Disable Selected in Patient List. Select the Patient name by using the check box and click Disable Selected option.

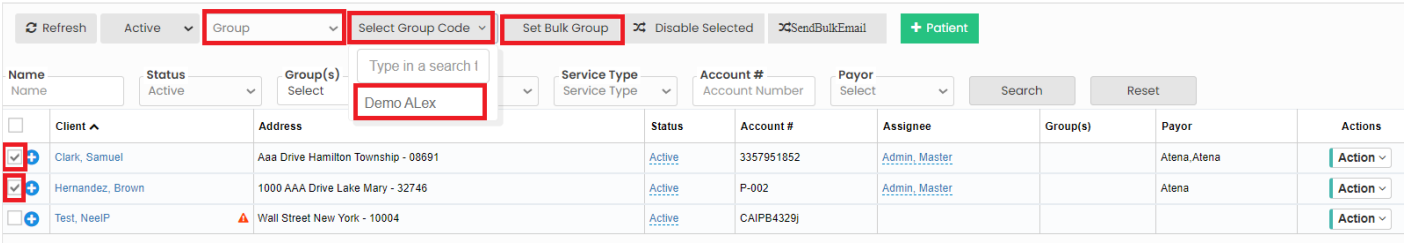

Restore Deleted Patient

The Deleted Patient can be activated by using the option Enable Selected in Deleted Patient List. Select the Patient name by using the check box and Click Enable Selected option.

Bulk update Patient Group

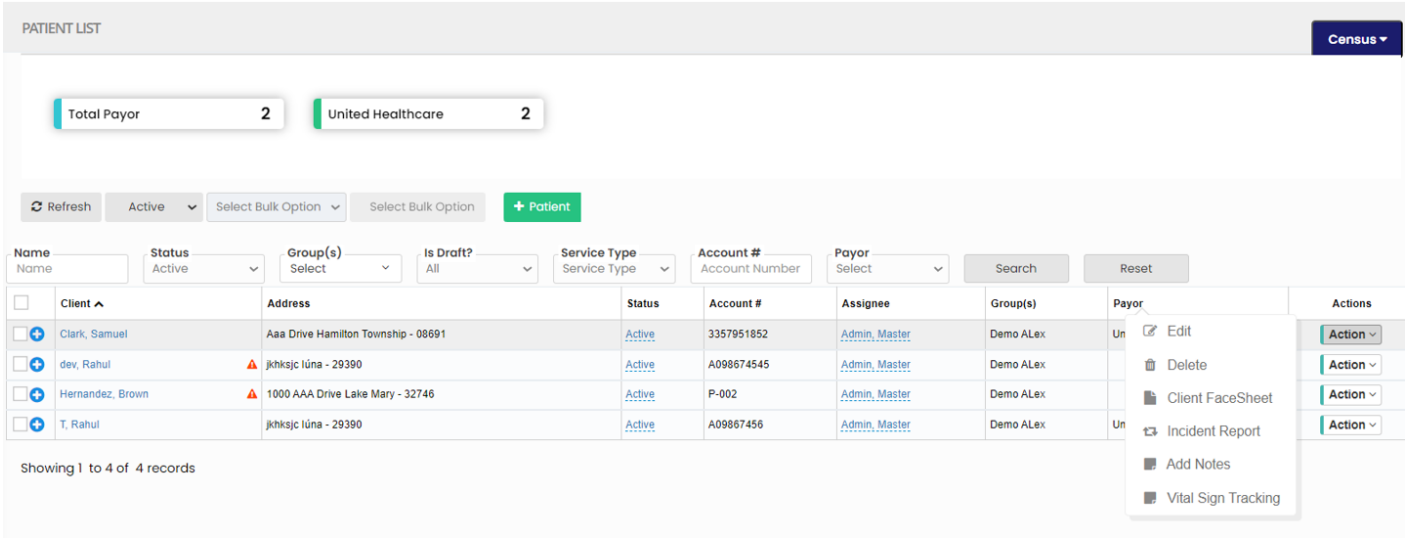

The user can bulk update the patient group by using the option Set Bulk Group in patient list. Select the Patient name by using the check box and click Group under Select bulk option. Now select the Group code to be updated and click Set Bulk Group in patient list. Likewise we can Bulk update Assignee and Status for the patient.

Features under Action

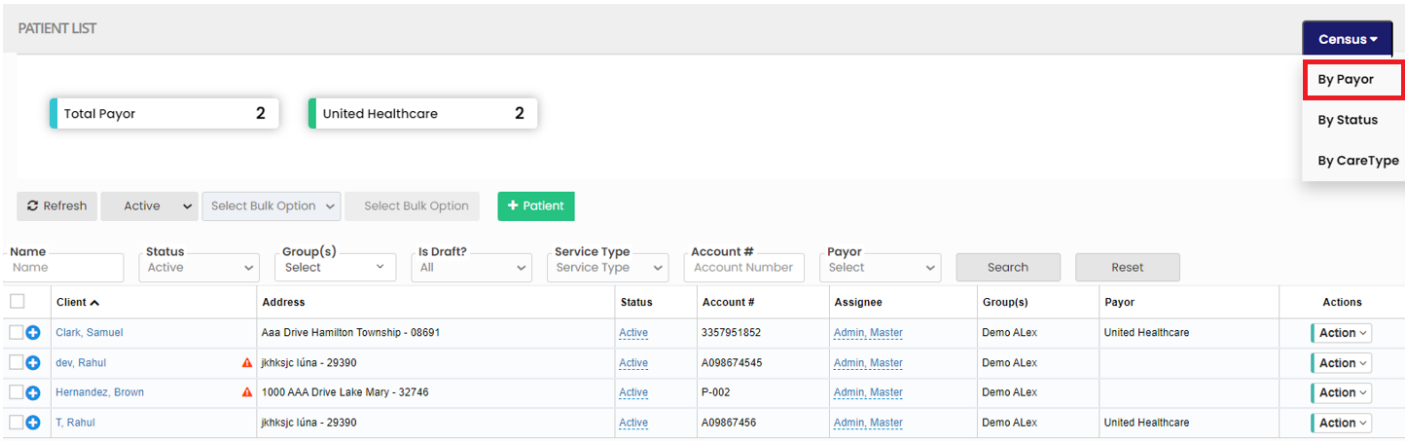

The following features are uploaded for the patient under Action in client list.

- Edit
- Delete
- Client Face Sheet
- Incident Report
- Add Notes
- Vital Sign Tracking

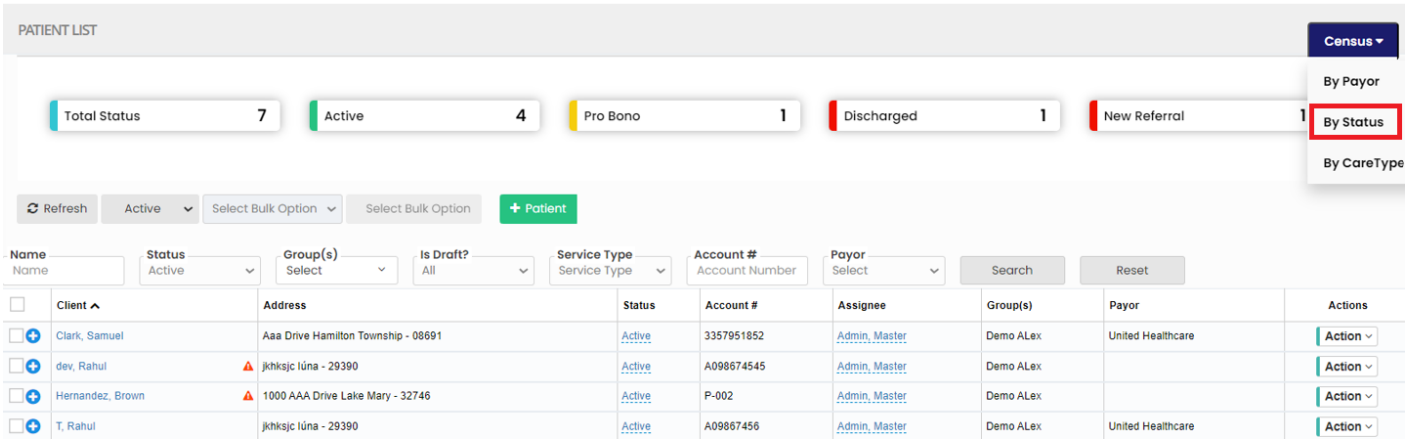

Census

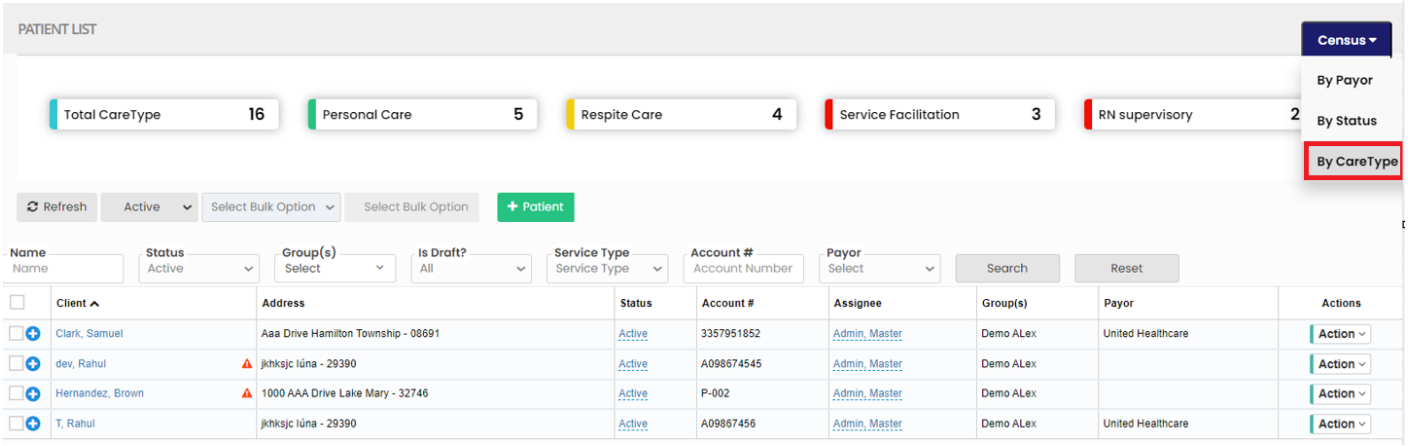

The number of Payor for the list of patients can be viewed by using the option Payor under Census.

The number of patients according to their Status can be viewed by using the option By Status in Census.

The user can sort the number of patient in the list according to their Care type by using the option By Care Type in Census.
