

Case Manager

A case manager plays a crucial role in coordinating and managing the care of patients in their own homes. They assess the patient's needs, create care plans, coordinate with healthcare providers, ensure necessary services are provided, and monitor the patient's progress, all while focusing on maintaining the patient's comfort and well-being in a home setting.

Adding Case Manager

Note: All Fields marked with * are mandatory and must be filled out, otherwise the system will generate an error indicating that the required information is missing.

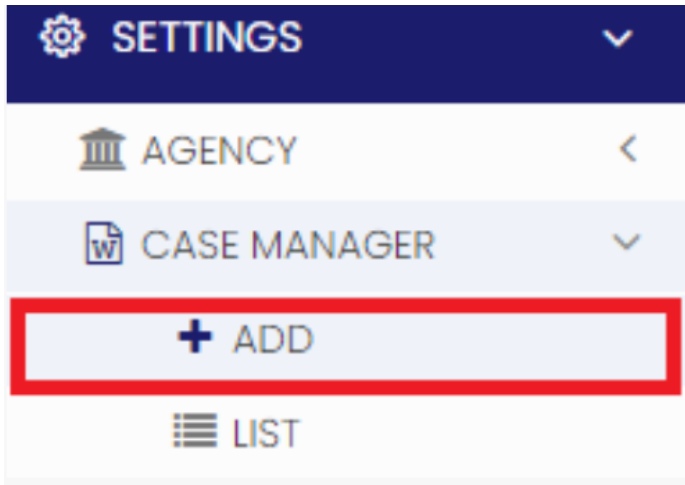

Settings >> Case Manager >> +Add option

The Case Manager serves as the central point of contact for all involved parties, including the patient, family members, caregivers, physicians, therapists and other healthcare professionals. The Case Manager maintains accurate and up-to-date documentation of the patient's care.

By documenting the Case Manager details in the software, the entire care team can easily identify and communicate with the designated case manager, streamlining the coordination process.

Case Manager play a role in determining the level of care required for patients and involved in the billing and reimbursement process.

The Case Manager details can be added in the system under Settings >> Case Manager >> +Add option.

Update the required fields in Case Manager details option and Click Save.
