

Aggregator Log, Pending Schedules and Virtual Visit

- An Aggregator log is a centralized data that collects and consolidates information from various sources, including healthcare records. It facilitates real-time monitoring, data analysis, and secure storage, helping healthcare providers make informed decisions and manage patient care effectively.
- Pending schedules refer to planned patient visits and tasks waiting for completion. Proper management of these schedules is crucial for ensuring timely and effective care for patients in their homes.
- A virtual visit is a remote healthcare consultation using digital technology, like video conferencing. It allows professionals to assess, consult, and educate patients in their homes. Virtual visits enhance accessibility and reduce the need for in-person appointments, benefiting those with mobility constraints or remote locations.

Aggregator Log

Scheduling >> Aggregator Logs

To view the Visit Status, enter the Patient name, Start Date, End Date and the Aggregator Name in the system and click search option.

 Refresh

		Name	Medicaid	Start Date ^	End Date	Address	Employee	Aggregator	Last Sent On	Status	Action
		<input type="text"/>	<input type="text"/>	<input type="text" value="MM/DD"/>	<input type="text" value="MM/DD"/>	<input type="text" value="Search By Address"/>	<input type="text" value="Se ^"/>	<input type="text" value="Select ^"/>	<input type="text" value="MM/DD"/>	<input type="text" value="Select ^"/>	<div><div>Search</div><div>Reset</div></div>

The following screen appears, and we can view the status of the Visits.
