

Billing / Prior Authorization

- Payor information comprises essential data on the entities responsible for covering healthcare costs by government programs like Medicare or Medicaid, or patients themselves.
- Prior authorization involves obtaining approval from insurance payors before providing specific medical services.

Adding Patient Payors

Healthcare payors play a crucial role in the healthcare system by providing financial coverage and helping individuals access necessary medical care.

The Payor details of the patient can be added in the system by using the option Billing / Authorization. Select the Patient Payor and update the required Payor Information and Click Save.

Client >> List >> Select Patient from List >> Billing / Prior Authorization >> Payor

Link Option

The Link option is used to link the Authorization code with the schedules which is created without Prior Authorization.

If the user created the schedules without Prior Authorization for a patient and receives the Authorization details later, then the schedules without Authorization can be linked with the Authorization details added in the system for the past and future schedules.

Client >> List >> Select Patient from List >> Billing / Prior Authorization >> Prior Authorization

Click Link option on the right side of the Authorization details under Action.
