

# Internal Messaging / Notes

Internal messaging tools enable caregivers, nurses, and administrators to coordinate patient care, share vital information, and manage schedules efficiently.

## Internal Messaging

The Internal Messaging option is used to send internal messages from the patient to the employee. The user has to click +Add New Message option to send the messages.

**Client >> List >> Select Patient from List >> Internal Messaging**

The screenshot shows the 'Internal Messaging' tab selected in the top navigation bar. Below the tabs, there is a checkbox for 'Assigned to me only' and a green '+ Add New Message' button. A table displays one message record:

Message	Assignee	Status	Added By	Added Date	Action
erlelelet	Catts, Tanya	Open	Admin, Master	10/07/2023	 

Showing 1 to 1 of 1 records

Select the Employee name and enter the message for the employee in the system. Click Save option to send the message.

The screenshot shows the 'Add New Message' modal form. At the top, it says 'EDIT PATIENT - CLARK, SAMUEL 45Y 7M MALE / #3357951852 / LOCATION: N/A / STATUS: ACTIVE'. The modal has a close button (X) in the top right corner. Inside the modal, there is a dropdown menu for 'Assignee\*' with the text 'Select Assignee' and a text area for 'Message\*'. At the bottom of the modal are 'Cancel' and 'Save' buttons. In the background, the 'Internal Messaging' tab is visible, showing the same table as in the previous screenshot.

## Notes

The Notes Tab is used to update the internal notes for the patient in the system. Click +Add Note option to enter the notes.
