

Set up

Setting up an application is the process of installing, configuring, and customizing software or systems to ensure they work as intended. It involves tailoring the application to specific needs, setting user permissions, and preparing it for use, ensuring a smooth and effective operation.

Note: All Fields marked with * are mandatory and must be filled out, otherwise the system will generate an error indicating that the required information is missing.

User Login

The User Login on the top right corner of the software contains the following features:

Employee - This feature shows the list of permissions that can be given for the particular role in accessing the application. The user can check the roles to only view, Add/ update the data in the application and also to delete the information in the application.

Patient - This feature shows the list of permissions that can be given for the particular role in accessing the application. The user can check the roles to only view, Add/ update the data in the application and also to delete the information in the application.

Masters - Settings - Settings in software refer to configurable options that allow users to customize various aspects of the application to suit their preferences or requirements. The access for list of features under Settings in the application can be given by using the option Masters in the Roles and Permissions. The user can check the roles to only view, Add/ update the data in the application and also to delete the information in the application.

Referral Tracking - Prospects

The access for list of features under Prospects in the application can be given by using the option Referral Tracking in the Roles and Permissions. The user can check the roles to only view, Add/update the data in the application and also to delete the information in the application.

System Roles and Permissions

Super Admin

The Super Admin plays a pivotal role in overseeing and managing the administrative aspects of the organization. This role involves managing information systems, ensuring data security and compliance, and providing technical support to optimize workflow and enhance patient care delivery.

- Create, modify, and deactivate user accounts as needed.
- Assign roles and permissions to users based on their responsibilities and access requirements.
- Configure and customize system settings based on organizational requirements.
- Oversee the implementation, maintenance, and optimization of information systems and electronic health record (EHR) platforms used within the organization.
- Provide training and support to staff members on security awareness, data handling best practices, and compliance with privacy regulations.
- Monitor data integrity and implement measures to maintain data quality and consistency.
- Implement and enforce security protocols to safeguard sensitive data and protect against unauthorized access.

Registered Nurse (RN)

The Registered Nurse (RN) plays a pivotal role in delivering comprehensive and compassionate healthcare services to patients in their homes. This position involves providing skilled nursing care, coordinating interdisciplinary care teams, and promoting patient education and self-management.

- Provide skilled nursing interventions such as wound care, medication management, intravenous therapy, and disease management in accordance with physician orders and nursing protocols.
- Perform clinical procedures safely and competently, ensuring adherence to infection control practices and patient safety standards.
- Assess patients' response to treatment, monitor for changes in health status, and modify care plans as necessary.
- Collaborate with physicians, therapists, social workers, and other healthcare professionals to ensure continuity of care and effective care transitions.
- Empower patients to actively participate in their care and make informed decisions about their health.

Administrator

The Administrator is responsible for overseeing the overall operation of the organization, including strategic planning, financial management, regulatory compliance, and quality improvement initiatives. This leadership position plays a pivotal role in ensuring the delivery of high-quality, patient-centered care and the attainment of organizational goals.

- Establish and maintain effective communication channels with stakeholders, including staff members, patients, caregivers, referral sources, and community partners.

- Develop and implement policies, procedures, and protocols to promote regulatory compliance, patient safety, and quality of care.
- Conduct regular audits, assessments, and performance reviews to monitor adherence to standards of practice, identify areas for improvement, and mitigate risks.
- Provide leadership and supervision to administrative and clinical staff, fostering a positive work environment, professional growth, and teamwork.
- Recruit, hire, train, and retain qualified staff members, ensuring sufficient staffing levels to meet patient care needs and organizational objectives.

PCA / CNA - Personal Care Aide (PCA) / Certified Nursing Assistant (CNA)

The Personal Care Aide (PCA) or Certified Nursing Assistant (CNA) plays a vital role in supporting patients with activities of daily living (ADLs), providing personal care, and assisting with basic medical tasks under the supervision of a registered nurse or other healthcare professional. This position is critical in ensuring the comfort, safety, and well-being of patients receiving care in their homes.

- Help patients with personal hygiene tasks such as bathing, grooming, oral care, and toileting.
- Provide assistance with mobility, including transferring, positioning, and ambulation as needed.
- Provide feeding assistance to patients who require help with eating or drinking, ensuring proper nutrition and hydration.
- Assist patients with medication administration, including opening medication containers, handing pills, and providing water as needed.
- Measure and record vital signs such as temperature, pulse, respiration rate, and blood pressure under the direction of a registered nurse or healthcare professional.
- Provide companionship and emotional support to patients, engaging in conversation, activities, and social interaction to promote mental and emotional well-being.

HHA - Home Health Aide

The Home Health Aide (HHA) plays a fundamental role in providing essential personal care and support to patients who require assistance with activities of daily living (ADLs) and instrumental activities of daily living (IADLs) in the comfort of their own homes. Working under the supervision of a registered nurse or other healthcare professional, the HHA helps to promote the independence, safety, and well-being of patients receiving home health care services.

- Assist patients with personal hygiene tasks such as bathing, showering, grooming, oral care, and toileting.
- Encourage and support patients in performing range of motion exercises and other prescribed mobility exercises.
- Assist patients with meal preparation, including planning, cooking, and serving nutritious meals based on their dietary preferences and restrictions.
- Remind patients to take prescribed medications according to their medication schedules.

- Assist with laundry, including washing, drying, folding, and putting away clothes and linens.
- Monitor and record patients' food and fluid intake, as well as any dietary changes or concerns.

Clinical Team

The Clinical Team consists of healthcare professionals who collaborate to provide comprehensive and coordinated care to patients in their homes. This interdisciplinary team plays a critical role in assessing patients' needs, developing individualized care plans, and delivering skilled medical services to promote optimal health outcomes and quality of life.

- Conduct comprehensive assessments of patients' medical, functional, and psychosocial needs in the home environment.
- Assess patients' psychosocial needs, social support systems, and environmental factors that may impact their health and well-being.
- Facilitate communication and collaboration among members of the clinical team, including nurses, therapists, social workers, and other healthcare professionals.
- Communicate regularly with patients, families, and caregivers to provide updates on the patient's progress, address concerns, and promote adherence to the care plan.
- Coordinate care transitions, discharge planning, and long-term care arrangements in collaboration with patients, caregivers, and other healthcare providers.
- Coordinate physical therapy, occupational therapy, speech therapy, and other rehabilitative services as needed to help patients regain or maintain functional independence.

Nurse

The Nurse is responsible for delivering skilled nursing services to patients in their homes, collaborating with interdisciplinary team members, and promoting continuity of care to support patients' health and well-being in the community setting.

- Provide skilled nursing services such as wound care, medication management, intravenous therapy, catheter care, and disease management in accordance with physician orders and evidence-based practice guidelines.
- Conduct thorough assessments of patients' physical, emotional, and psychosocial needs in the home environment, including comprehensive health histories and ongoing monitoring of health status.
- Collaborate with interdisciplinary team members, including therapists, social workers, home health aides, and other healthcare professionals, to ensure coordinated and holistic care delivery.
- Perform clinical procedures safely and competently, adhering to infection control protocols, patient safety standards, and regulatory requirements.
- Communicate regularly with patients, families, and caregivers to provide updates on the patient's progress, address concerns, and promote adherence to the care plan.

Staffing

The Staffing Coordinator is responsible for managing the needs of the organization, ensuring adequate coverage for patient visits, and coordinating schedules for healthcare professionals to optimize efficiency and meet patient care requirements.

- Coordinate and manage the scheduling of patient visits and caregiver assignments based on patient needs, staffing availability, and organizational priorities.
- Monitor and adjust schedules as needed to accommodate changes in patient condition, caregiver availability, or unexpected events.
- Coordinate orientation and onboarding activities for new hires, providing training on policies and procedures.
- Collaborate with clinical and administrative teams to ensure effective communication and coordination of care delivery.
- Serve as the primary point of contact for staff members regarding scheduling inquiries, shift changes, and other staffing-related issues.

Office Assistant

The Office Assistant provides administrative support to the clinical and administrative teams, assisting with various office tasks to ensure the smooth operation of the organization and the delivery of high-quality care to patients in their homes.

- Assist with the intake process for new patients, collecting demographic information, insurance details, and medical history forms as required.
- Maintain accurate and up-to-date appointment calendars, ensuring that patient visits are coordinated efficiently and effectively.
- Answer incoming calls, take messages, and route calls to the appropriate staff members, ensuring timely and accurate communication.
- Assist with scheduling patient visits, coordinating appointments, and updating schedules for healthcare professionals using scheduling software or systems.
- Assist patients and caregivers with billing inquiries, payment arrangements, and financial assistance programs as needed.

Announcement

What's new in Ver. 2.1.36

Posted On: 6/24/2023

Bugs:

- Some UI Issues fixed on referral timeslot issues like days dropdown and +1 day etc.

Features:

- On Adult Daycare –Added option for skipping patient task list, and it's based on permission. When we click on the clock-out button then asking Do we want to Skip the Attendance Patient Task if **select yes then skip the task list and redirect to the clock-out page** if select no then it renders to the task list page.
- Change Schedule hyperlink added in the ClockIn Out list on Dashboard. Here user can change the scheduled employee and time.
- Patient schedule days name information added on a patient schedule list, And also here we can get schedule-related complete information and we can assign the schedule to another employee.

Your feedback is very valuable to us to improve the features and enhancement. Please provide your feedback by emailing us at helpdesk@myezcare.com
